

```
1 //NeedLoan class finds the loan-providing banks
2 public class NeedLoan
3 {
4     public static void main(String[] args)
5     {
6         // To find a loan provider based on the loan amount, annual interest, and
        // number of years to pay back in installments
7         BankFinder.findLoanProvider();
8     }
9 }
```
